United Air Specialists Presents Commercial and Kitchen Air Cleaning Systems at 2005 AHR Expo

CINCINNATI, OH –February 7, 2005 – United Air Specialists, Inc. (UAS), a leading manufacturer of technologically innovative, high-performance air filtration systems and equipment for a wide range of commercial and industrial environments, will exhibit their commercial air cleaners and kitchen emission control systems for the first time at the 2005 AHR Expo at **Booth # 3979**.

"We're excited to introduce our broad range of products to the engineers, facility/plant managers, contractors and other AHR Expo attendees," said Matt Hoffman, UAS Sales and Marketing Manager. "I think our booth will feature unique and beneficial elements to members of the HVAC&R industry."

Providing ceiling-hung, wall-mounted, free-standing and concealed systems for a variety of indoor air quality applications as well as commercial solutions to eliminate problems caused from discharge from cooking ventilation in kitchen environments, UAS will feature the following products at the AHR Expo:

Commercial Air Cleaning Products

❑ VisionAir

UAS' newest commercial air cleaning system, the VisionAir, filters smoke and other pollutants from the air to contribute toward a healthier environment. VisionAir units are available in two sizes and are ideal for busy meeting rooms, doctor's offices, nursing homes and a variety of other high traffic locations. These systems feature interchangeable media or electrostatic filters and come standard with a remote control. Options include: virus/bacteria-killing UV-light, "smart technology" air monitor and odor-eliminating filters.

❑ Smokeeater®

UAS was the first to offer the original Smokeeater, a two-stage electrostatic precipitator, to effectively filter smoke and other pollutants from the air. Available as a wall-mounted, tabletop, ceiling-mounted, flush-mounted or concealed system, this unit is a standard not only in bowling alleys, bars and restaurants but also in offices, hospitals, body shops, schools, print shops and a variety of other gathering places.

❑ Crystal-Aire®

Able to serve more than one area at a time with multiple filtration devices, the Crystal-Aire is a modular concealed air cleaning system that can be adapted to virtually any room configuration. Specifically designed for removal of smoke, dust and other hazardous contaminants from the air, available specifications include: motor/blower module, electrostatic precipitator module, bag filter module, HEPA filter module, odor control and fresh air inlet. Each unit is contained in an easy access cabinet structure.

Kitchen Emission Systems Products

□ **SMOG-HOG® PSG11 Kitchen Emission System**

UAS' SMOG-HOG Kitchen Emission Systems are the complete solution to eliminating grease, smoke and odors from busy kitchen environments. Keeping restaurants in compliance with strict federal, state and local environmental standards, the PSG Series can be installed before construction or retrofit into an existing building. The unit uses electrostatic precipitation to attract and remove both large and small particles.

UAS Product Benefits

In addition to providing an improved atmosphere for employees, customers, patients, students and more, UAS clean air systems can help your business save money. UAS air cleaners reduce cleaning and housekeeping costs by minimizing contaminant build-up on walls, windows and furniture.

About United Air Specialists

For close to 40 years, United Air Specialists, Inc. has been a leading manufacturer of technologically innovative, high-performance air filtration systems and equipment for a wide range of commercial and industrial environments and applications. United Air Specialists, Inc., www.uasinc.com, is a CLARCOR company.
