### **United Air Specialists, Inc. introduces online calculator to estimate annual savings on dust collection equipment**

**Cincinnati, OH – February 13, 2009** – United Air Specialists, Inc. (UAS), manufacturer of industrial air pollution control equipment, announces the launch of an interactive cost savings calculator on its web site ([www.uasinc.com/FilterCalculator.aspx](http://www.uasinc.com/FilterCalculator.aspx)). The easy-to-use calculator enables users to determine their approximate annual energy and operational savings by using UAS' Protura™ Nanofiber cartridge filters in conjunction with UAS dust collection equipment.

Users simply input their required CFM or horsepower, cost of electricity, number of cartridges needed and maintenance/service labor rate—and within seconds, are shown their estimated annual cost savings. In addition, environmentally conscious users can also make note of how much they can reduce their carbon footprint reduction by viewing an estimate of saved carbon emissions.

UAS' cost savings calculator is based on the combination of its Protura Nanofiber cartridge filters and patented pulse blast cleaning technology. In any dust collector, Protura filters last twice as long as 80/20 cellulose or commodity filters due to their surface loading characteristics. But when used in conjunction with UAS' optimized dust collectors, they also ensure use of less compressed air—which means a significant cost savings in plant utilities.

#### **About United Air Specialists**

For more than 40 years, United Air Specialists, Inc. has been an industry leader in designing and manufacturing high-performance air filtration equipment for a wide range of industrial applications. United Air Specialists, Inc. is a CLARCOR company. For more information, visit [www.uasinc.com](http://www.uasinc.com) or call 800-252-4647.
